Water is coming through the bathroom ceiling of Apartment 4 this morning. It has soaked the bath mat and is dripping near the light fixture. Please send someone today. I am home all day.

Thanks for letting us know. Our plumber can look at it when he is next in the building.

No one has come. The leak continues every time the unit upstairs runs water. There is now black mold on the bathroom ceiling and on the bedroom wall. Please repair the leak as paragraph 12 of the lease requires.
